

The Heritage Capital Gold Strategy ("Heritage") is a long-only strategy that takes a short to intermediate-term outlook on the direction of gold; buying into weakness and selling into strength. The strategy uses the Rydex Precious Metals mutual fund (RYPMX) to express its view. The strategy will invest up to 100% exposure and can be in cash for long periods of time.

Summary of Terms

Inception Date	January 1, 2001	Management Fee	2.50%
Minimum Investment	\$100,000	Custodian	TCA
Subscriptions	Daily	Legal Counsel	Stark & Stark
Redemptions	Daily		

Description Of The Technical Terms Used In This Report

Returns:

Compound ROR: The annualized rate of return that has been compounded since inception.

Standard Deviation: A measure of the degree to which an individual probability value varies from the distribution mean. The higher the number, the greater the risk.

Down Deviation (3.00%): A value representing the potential loss that may arise from risk as measured against a minimum acceptable return. Downside deviation aims to isolate the negative portion of volatility.

Sharpe Ratio (3.00%): A reward of a portfolio's excess return relative to the total variability of the portfolio.

Cumulative Return (since inception): A rate of return that has been compounded for more than one year.

Cumulative VAMI (growth of \$1000): The Value Added Monthly Index reflects the growth of a hypothetical \$1,000 in a given investment over time.

Benchmarks: The benchmarks used in this report are the Philadelphia Gold and Silver (PGS) and S&P 500 Total Return (S&P) indices.

Correlation To Benchmark(s):

Alpha: The premium an investment portfolio earns above a certain benchmark. A positive alpha indicates that the investor earned a premium over that index.

Beta: The measurement of a dependent variable's (fund's) volatility relative to an independent variable (benchmark). Beta is the percent change in the price of the dependent variable given a 1% change in the independent variable. This reveals if the dependent variable moves in step with the independent variable; where a beta of 1 indicates perfect alignment.

Correlation: The degree to which the fluctuations of one variable are similar to those of another.

R-Squared: A correlation term describing the variance in the dependent variable that can be explained by the independent or explanatory variable. The coefficient of determination (R-Squared) is a pure number ranging 0 to 1, with 1 giving perfect correlation and 0 giving perfect non-correlation. It is often used to describe the amount of investment risk in portfolios that can be associated with market risk.

CMG Capital Management Group, Inc. Disclosure Statement

CMG Capital Management Group, Inc. ("CMG") is an SEC registered investment adviser located in the Commonwealth of Pennsylvania. Heritage Capital, LLC ("Heritage") is an SEC registered investment adviser located in the state of Connecticut. CMG has entered into a sub-advisory agreement with Heritage. CMG serves as the advisor. Heritage serves as the sub-advisor to the strategy.

Performance Disclosure

Performance from January 2001 to September 2008 represents performance from an actual tracking account managed by Paul Schatz, President of Heritage Capital, LLC, and tracked independently by Theta Investment Research, LLC. Performance from October 2008 to the present is based on a blend of actual accounts managed by CMG. Individual returns may vary substantially from those presented due to differences in the timing of contributions and withdrawals, account start dates, and actual fees paid.

Performance results from inception to the present are net of the current advisor fee for the program, 2.50%, paid quarterly in arrears. Performance is not net of custodial fees. The performance results shown include the reinvestment of dividends and other earnings. Comparison of the Heritage Capital Gold Strategy to any other indices is for illustrative purposes only and the volatility of the indices used for comparison may be materially different from the volatility of the Heritage Capital Gold Strategy due to varying degrees of diversification and/or other factors. Different types of investments involve varying degrees of risk and there can be no assurance that any specific investment will be profitable. CMG and Heritage do not make any representation that the Heritage Capital Gold Strategy will or is likely to achieve returns similar to those shown in the performance results in this presentation. Heritage reserves the right to trade different funds within their models.

The Heritage Capital Gold Strategy invests in Rydex mutual funds. Information pertaining to any Rydex mutual fund that is a current component of the strategy is set forth in each respective mutual fund's prospectus, a copy of which is also available from CMG (or on CMG's website, www.cmgfunds.net). Information pertaining to Heritage's advisory operations, services, and fees is set forth in Heritage's current disclosure statement, a copy of which is available from CMG upon request.

Past performance may not be indicative of future results. Therefore, no current or prospective client should assume that future performance will be profitable, or equal to any corresponding historical index. The composition/percentage weighting of each corresponding CMG index (i.e. Philadelphia Gold and Silver Miners Index or the S&P 500 Total Return) is also disclosed. For example, the Philadelphia Gold and Silver Miners Index ("Philly Gold and Silver") is an index that tracks and measures the performance of equities securities of the leading companies involved in the mining of gold and silver. The daily tracking of equity securities of the sixteen component companies provides the index with its measurement number. The historical performance results of the Philly Gold and Silver (and those of or all indices) do not reflect the deduction of transaction and custodial charges, nor the deduction of an investment management fee, the incurrence of which would have the effect of decreasing indicated historical performance results. The Philly Gold and Silver is not an index into which an investor can directly invest. The historical Philly Gold and Silver performance results (and those of all other indices) are provided exclusively for comparison purposes only, so as to provide general comparative information to assist an individual client or prospective client in determining whether the performance of CMG's or Heritage's portfolio meets, or continues to meet, his/her investment objective(s). A corresponding description of the other comparative index, the Barclays Aggregate Bond Index (i.e., a fixed income index) is available from CMG upon request. It **should not** be assumed that CMG or Heritage strategy holdings will correspond directly to any such comparative index. The CMG performance results do not reflect the impact of taxes.

In the event that there has been a change in a client's investment objectives or financial situation, he/she/it is encouraged to advise CMG immediately. Different types of investments and/or investment strategies involve varying levels of risk, and there can be no assurance that any specific investment or investment strategy (including the investment strategies devised or undertaken by CMG) will be profitable for a client's or prospective client's portfolio. All performance results have been compiled solely by CMG and have not been independently verified. Information pertaining to CMG's advisory operations, services, and fees is set forth in CMG's current disclosure statement, a copy of which is available from CMG upon request.

Data for the Barclays Aggregate Bond and S&P 500 Total Return indices was calculated using PerTrac Financial Solutions, LLC. It should not be assumed that CMG account holdings will correspond directly to any such comparative index.

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE PERFORMANCE
